

Mahir Thakur

Final-Year B.Tech Student, Computer Science Engineering (AI & Robotics)
VIT Chennai (2023-2027)

✉ mahir.thakur2023@vitstudent.ac.in 📞 7488662130 🔗 LinkedIn 🌐 GitHub

Professional Summary

Final-Year B.Tech student in Computer Science Engineering (AI & Robotics) at VIT Chennai with experience in Artificial Intelligence, Machine Learning, Web Development and Cybersecurity. Developed AI-powered phishing detection systems, browser security solutions, and interactive web applications using Python, FastAPI, React, and Machine Learning frameworks. Currently pursuing an Artificial Intelligence Internship through Infosys Springboard. Strong foundation in Data Structures and Algorithms with hands-on experience in building scalable, real-world software solutions.

Education

Vellore Institute of Technology, Chennai (2023–2027)

B.Tech in AI & Robotics

CGPA: 8.18

MLT College, Saharsa (Class XII)

Senior Secondary (12th)

80.6%

Secondary School (Class X)

Matriculation (10th)

86%

Technical Skills

Programming Languages: Python, Java, C++, C, SQL

Data Structures & Algorithms: LeetCode (160+ Problems), CodeChef (1300+ Rating)

Web Development: HTML, CSS, JavaScript, React, Flask, FastAPI

AI/ML: Machine Learning, Deep Learning, Neural Networks, TensorFlow, Scikit-learn

Tools & Technologies: Git, GitHub, Docker, Kubernetes

Software Development Practices: Agile, Scrum

Soft Skills: Team Collaboration, Project Management, Problem Solving, Communication

Projects

AI-Powered Phishing Detection and Browser Security System *Technologies: Python, FastAPI, Scikit-learn, JavaScript, HTML, CSS, Chrome Extension API, Render, Pandas, GitHub*

- Developed an end-to-end phishing detection system that analyzes email content and embedded URLs using Machine Learning techniques to identify malicious threats.
- Trained and integrated email and URL classification models using phishing datasets, leveraging feature engineering techniques such as URL structure analysis, HTTPS verification, IP-address detection, and suspicious keyword extraction.
- Built and deployed a FastAPI-based backend on Render, exposing REST APIs for real-time phishing prediction and automated threat classification (SAFE, SUSPICIOUS, PHISHING).
- Developed a Chrome Extension and interactive web dashboard that perform real-time phishing analysis, highlight malicious URLs, and provide confidence scores with explainable security insights.

Virtual Painter

Technologies: JavaScript, HTML, CSS, MediaPipe Hands, TensorFlow.js, Firebase Authentication, Web Speech API, EmailJS

- Developed an AI-powered virtual painting application that enables users to draw in the air using real-time hand gesture recognition through a webcam.

- Implemented gesture-based controls using MediaPipe Hands, including index-finger drawing, two-finger eraser mode, and pinch-to-clear canvas functionality.
- Integrated voice command support using the Web Speech API to control drawing actions such as color selection, brush thickness adjustment, and canvas clearing.
- Built an AI sketch recognition system using TensorFlow.js and Google's QuickDraw model to identify user drawings in real time.
- Developed an interactive and responsive user interface with drawing tools, canvas controls, drawing export functionality, and real-time performance monitoring.

Experience

Artificial Intelligence Intern, Infosys Springboard

Jun 2026 – Present

Virtual Internship Program

- Participating in an industry-oriented Artificial Intelligence internship focused on Machine Learning, Deep Learning, and AI applications.
- Gaining hands-on experience in data preprocessing, model development, model evaluation, and AI project implementation.
- Working with Python-based AI/ML tools and frameworks to solve real-world business and technology problems.
- Completing guided projects, technical assessments, and learning modules covering modern AI concepts and industry best practices.

Web Developer Intern, SpectoV

Jan 2025 – Jul 2025

AR/VR assistive technology startup

- Revamped and maintained the company's official website, leading to a 40% increase in user traffic and a 25% reduction in page load time.
- Integrated new features that boosted site performance, contributing to a 30% rise in client satisfaction.
- Implemented new features and optimized site performance.
- Managed updates and handled confidential project information.

Certifications & Achievements

AWS Certified Cloud practitioner

DataQuest2.0 Hackathon Winner

The Blueprint Hackathon Winner

Clubs & Extracurricular Activities

Code Y Gen - Web Development Department

Magadh Mithila Club - Operations Department
